Set off an alarm

1. From the keypad

➲ Press the `clr` button on the keypad

➲ Press `PANIC` for 2 seconds.
   After 3 short beeps, the control unit will emit a sharp beep
➲ Press `●` or `✱` or `♨`

2. From your remote control

➲ Press for more than 2 seconds on one of the bottom buttons.
   There are two alarms possible with the remote control:
   silent alarm `1` , alarm with siren `2`

> You can turn off the siren at any time
> by entering your user code followed by `OK`
> or by pressing the `OFF` button on your remote control

7

Unsetting after an alarm (alarm memo)

⤳ If an alarm has activated, during the unsetting of your system the screen of the keypad provides you with details of what caused the alarm | INTRUSION DETECTED |

⤳ Press the | OK | button to check the alarm memo and the keypad then gives details of the cause of the alarm | AREA N° DETECTOR NAME | (displayed for 5 seconds)

⤳ Then the keypad goes into standby mode after 40 seconds

Programming your system

From your keypad

1. Accessing programming mode

⤳ To access the various menus press the arrow keys ⌣ or ⌢ on the keypad

You need to go to level 3 to access management of the access codes

⤳ From the main menu: ⌢ | ACCESS LEVEL 1 |

⤳ Press | OK | | ACCESS LEVEL LEVEL: 1 |

⤳ Change the level by pressing twice on ⌢ | ACCESS LEVEL LEVEL: 3 |

⤳ Confirm by pressing | OK | | BADGE OR CODE? |

⤳ Enter the level 3 code then press | OK | to confirm | ACCESS LEVEL LEVEL: 3 |

⤳ Return to the main menu by pressing once on ⌣

2. Add a new access code

⤳ Press ⌢ several times until the following screen menu appears | BADGES/ ACCESS CODES |

⤳ Confirm with | OK | button

⤳ Enter an existing level 3 code (master code) and confirm with | OK |

⤳ To record a new code press | OK | once again

⤳ Enter the code (4 to 6 digits) followed by | OK | , confirm this code followed by | OK |

⤳ Enter the name associated with this code (SMS type data entry),

for example: HELENA, confirm by | OK |

NOTE: Creation of a code generates 2 sub-codes:
Code + 1: code which allows shutdown of the system while generating a silent alarm
Code + 2: code which allows shutdown of the system while generating an audible alarm

Example: Code 1999 will give respectively
2000 (silent alarm) and 2001 (audible alarm)

8

3. Delete an access code

➲ Press several times on ⌒ until the [BADGES/ ACCESS CODES] menu screen appears

➲ Confirm with the |ok| key

➲ Enter an existing level 3 code (master code) and confirm with |ok|

➲ Then press button ⌣ then |ok|

➲ Using the ⌒ button select the code to delete then |ok|

➲ Confirm deletion by pressing |ok| again

4. Exit from programming mode

➲ Press the |ESC NO| button for 5 seconds to go back to the main screen
